📍 NATURE TRAIL OF VUOSNAINEN

Right next to the Vuosnainen ferry port is a nature trail more than a kilometer long. The starting point is next to the restaurant Spauna. The nature trail runs mainly on the cliffs and someone's journey also in the forest. The route is not suitable for people with reduced mobility or prams. In the rain and in winter, the cliffs are very slippery, so moving around the route requires special attention.

📍 ARCHIPELAGO MUSEUM

Kustavi Archipelago Museum is a local museum of cultural history maintained by the municipality of Kustavi. The museum's collection consists of objects and documents collected and donated from the Kustavi area, which tell about the life and livelihoods of the area in the past. On display are goods brought by sailors from their voyages, as well as tools and other artefacts related to the everyday life of the archipelago. The museum is open during the summer, from midsummer to the end of August. At other times, guided tours are available on request. It is easy to get to the museum either by bicycle or by car.

📍 THE CHURCH OF ST. JOHANNES

The Chapel of St. Johannes was built in the Middle Ages on the island of Vartsala. It is mentioned in the inventory of archipelago churches compiled by Mikael Agricola from 1554. When the chapel began to deteriorate in the 18th century, the idea arose to build a new church in the village of Kivimaa. No new church was built, but the Chapel of St. James was moved from Rahi. The moved and expanded chapel was consecrated as the Church of Gustav in 1783. The artefacts of the church are mostly old chapels.

📍 VARTSALA OLD SCHOOL

The store has a large selection of self-made candles as well as various gift, decorative and interior decoration items, such as tableware, textiles, lamps, storage baskets and postcards. The beautiful interior selection changes according to the themes and colors of the season. In the cozy café you can enjoy fresh pastries and pizza in high season. Apartment rental. You can also head here with your own boat.

📍 MIDSUMMER POLES

In addition to Åland and the Swedish-speaking archipelago, Midsummer pole or maistunki, is part of Kustavi's old Midsummer festival tradition. Kustavi is the only Finnish-speaking municipality where Midsummer poles have been raised for more than two hundred years. The poles are decorated and raised on Midsummer Eve with solemnity. North and South Vartsala both have their own poles.

📍 JUUVANNI SEASIDE COTTAGES

Juuvanni Seaside Cottages rents log cabins by the sea in beautiful landscapes for short and long term use. The equipment of the cottages includes e.g. an air source heat pump, a wood-heated sauna and hot water, and some also have indoor water. Each beach has swimming and its own rowing boat.

📍 TREK´N FOOD KUSTAVI

In addition to outdoor activities, Trek'n Food Kustavi offers rental of camping equipment, such as kayaks and canoes. Here you will find interesting program services regardless of the size of the group.

You will come to Vartsala from the mainland by Finland's largest road ferry. The castle trip takes less than ten minutes.

The Åland ferry leaves from Vuosnainen beach, where you can even take a day trip to Brändö municipality.
